SALESFORCE ADMIN COURSE

EPISODE 18 • STUDY NOTES

Complete Sales Process in Salesforce Lead, Account, Contact & Opportunity

A complete, easy-to-revise breakdown of the video — with tables, multiple diagrams, and a step-by-step walkthrough.

WHAT'S INSIDE

- What is Sales Cloud
- Lead → Account → Contact
- Opportunity & Stages
- Full Sales Process Flow
- Lead Conversion
- Real business example

1 Introduction 0:00 – 1:00

We've learned Objects, Fields, Relationships, Validation Rules, and more. Now let's connect the dots: **how does a company actually use Salesforce to sell**? How does a stranger become a customer, and how do sales reps track every stage of that journey?

> **Covered today:** What Sales Cloud is • The complete Lead-to-Opportunity process • Lead Conversion • Account • Contact • Opportunity • Naming conventions • A real business example • Full practical demo

2 What is Sales Cloud? 1:00 – 2:30

Sales Cloud is one of Salesforce's most popular products — it manages the **complete sales cycle**, from finding new prospects to converting them into paying customers.

IN SIMPLE WORDS

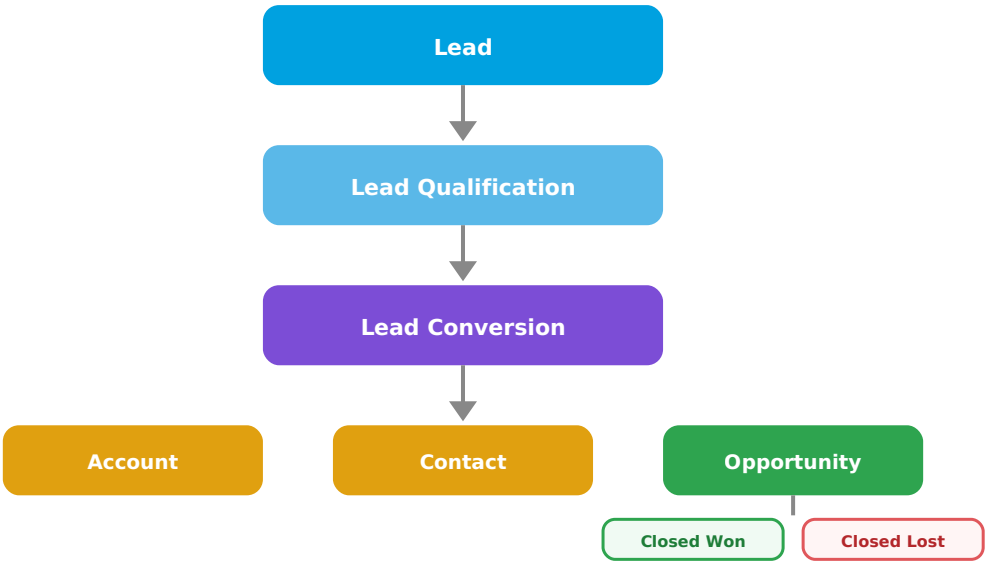

Sales Cloud helps companies sell more efficiently and track every customer interaction

What Sales Cloud Lets Companies Do

- Manage Leads
- Track Customers
- Manage Opportunities
- Forecast Revenue
- Improve Sales Performance

3 Complete Sales Process Overview 2:30 – 4:00

Before diving into each object, here's the full journey a prospect travels through:

This is the complete sales lifecycle followed by thousands of companies worldwide.

4 Step 1 — Lead 4:00 – 8:00

> **Lead**
>
> Someone who has shown interest in your business but hasn't become a customer yet.

How Someone Becomes a Lead

- Fills a "Contact Us" form
- Downloads a brochure
- Visits an exhibition booth
- Calls the sales team

Typical Lead Information

Field	Purpose
First Name / Last Name	Identify the person
Company	Identify the business
Email / Phone	Contact details
Lead Source	Where the lead came from
Status	Current stage of qualification

Naming Convention

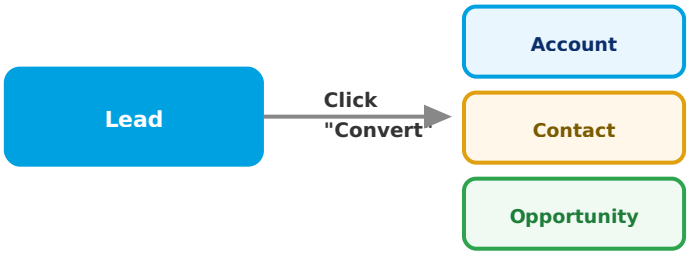

> Use meaningful, complete names: **"John Smith - ABC Technologies"** or **"Sachin Singh - Astrea IT"** — always pair the contact name with the company.

Practical Demo — Create a Lead

1. Open the **Leads** tab → click **New**.
2. Enter Name, Company, Email, Phone, Lead Source, and Status.
3. Click **Save** — your first Lead is created.

5 Step 2 — Qualify & Convert the Lead 9:30 – 12:00

The sales rep contacts the Lead. If genuinely interested, the Lead becomes **qualified**. Instead of manually creating records, Salesforce lets us **Convert** the Lead.

> **One click, three records:** Converting a Lead automatically creates the Account, Contact, and Opportunity — saving time and preventing duplicate data.

6 Step 3 — Account 12:00 – 14:00

Account

Represents an organization or business you're working with — think of the Account as **the company itself**.

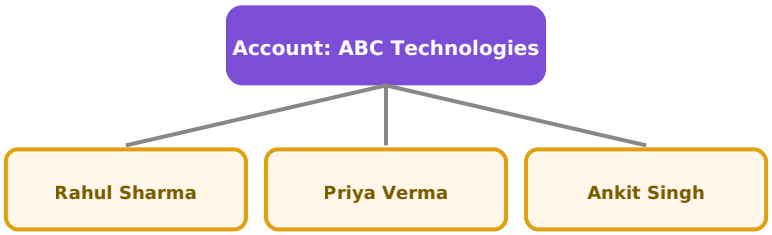

ABC Technologies | Infosys | TCS | Google

Every Account can have multiple Contacts and multiple Opportunities.

7 Step 4 — Contact 14:00 – 16:00

Contact

Represents an individual **person** associated with an Account.

One Account can have many Contacts — all employees of the same company.

8 Step 5 — Opportunity 16:00 – 19:00

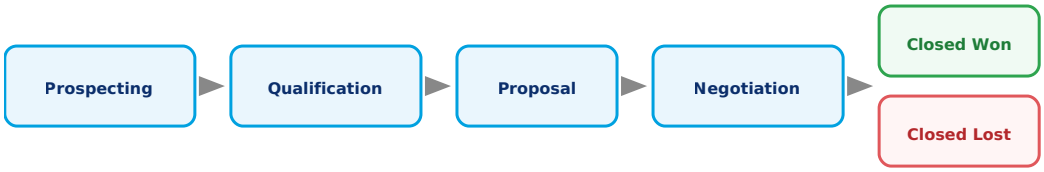

Opportunity

Represents a **potential deal** — this is where the sales team tracks the progress of a sale.

Typical Opportunity Fields

Field	Purpose
Opportunity Name	Identify the deal
Stage	Where the deal currently stands
Amount	Deal value
Close Date	Expected closing date
Probability	Likelihood of winning

Opportunity Stages

As the deal progresses, the Stage changes — ending in Closed Won (purchased) or Closed Lost (didn't purchase).

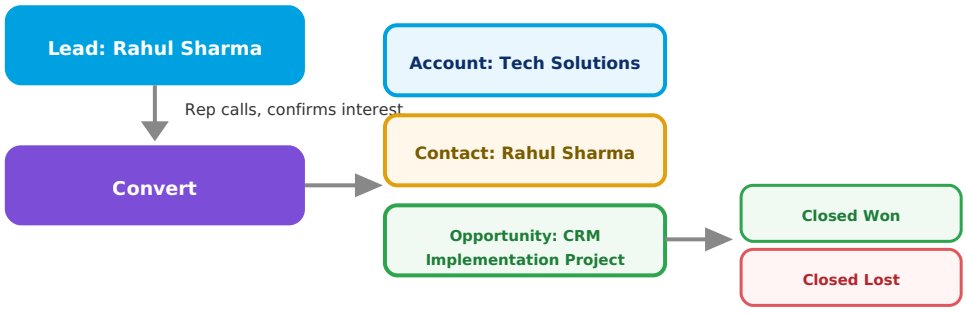

9 Practical Demo — Lead Conversion 19:00 – 22:00

1. Open the **Lead** created earlier.
2. Click **Convert**.
3. Salesforce automatically creates the **Account**, **Contact**, and **Opportunity**.
4. Open each record and notice how they're connected: Account = the company, Contact = the individual, Opportunity = the sales deal.

> **Why it matters:** Lead Conversion is one of the most important processes in Sales Cloud — it's the bridge from "maybe" to "tracked, active deal."

10 Real Business Example 22:00 – 24:00

A company named **Tech Solutions Pvt. Ltd.** — Rahul Sharma fills out a demo request form, and Salesforce creates a Lead.

If Rahul purchases, the Opportunity becomes Closed Won; otherwise, Closed Lost. This is exactly how businesses use Salesforce every day.

11 Best Practices 24:00 – 25:00

- ✔ Always create complete Lead records
- ✔ Avoid duplicate Leads
- ✔ Use meaningful Opportunity names
- ✔ Keep Opportunity Stages updated
- ✔ Convert Leads only after proper qualification
- ✔ Maintain accurate Account and Contact information

12 Episode Summary 25:00 – 26:00

- ✔ Sales Cloud manages the complete sales cycle, from Lead to Closed deal
- ✔ A **Lead** is a person who has shown interest but isn't a customer yet
- ✔ Converting a Lead auto-creates an **Account**, **Contact**, and **Opportunity**
- ✔ **Account** = the company, **Contact** = the individual, **Opportunity** = the tracked deal
- ✔ Opportunities move through Stages, ending in **Closed Won** or **Closed Lost**
- ✔ Clean naming conventions and disciplined data entry keep this whole process reliable
